Abstract (en)
[origin: EP0428762A1] In a slab-shaped paving element having a smooth middle section and tab-shaped attachments extending transversely to the plane of the middle section at the lateral edges of the middle section, provision is made, in order to permit different laying distances and forms of laying, for the lateral surfaces (3) each to have two attachments (4', 4'') side by side but at a distance apart, of which, in each case, one attachment (4') is arranged at diagonal corner regions (5) of adjoining lateral surfaces (3), and for the other attachment (4'') in each case of each lateral surface (3) to be formed with diagonal corner regions (6) in the lateral surfaces (3) at a distance from the other two. <IMAGE>
