Abstract (en)

[origin: EP0428954A1] A handwheel for operating the hatch cover (7) on a combat vehicle, especially a tank. The handwheel (8) is designed as a disc closed in the axial direction and consists of a material suitable for splinter and/or radiation protection. On a handwheel arranged centrally relative to the hatch, the diameter of the disc (8) is smaller than the inside diameter of the hatch by as little as possible. <IMAGE>
