Abstract (en)
[origin: EP0429035A2] The invention relates to a knife which consists of a blade, a bolster and a tang and in which the tang and the blade are welded on opposite end faces of the bolster and are composed of steel, and proposes, to achieve considerably simplified manufacture, that a sintered-steel bolster be provided, the material of the tang and the bolster having approximately the same hardness, which is less than that of the blade material. <IMAGE>
