Abstract (en)

[origin: EP0429400A1] This device is composed of a universal label support (1, 1') and fixing pieces (A, B, C, D, E, F) functionally adapted to various types of display stands. A support is linked to a fixing piece with the aid of standardised means of assembly. With the aid of a set of devices composed of a plurality of identical label supports and a set of fixing pieces, the uniform labelling of a set of different display stands is obtained.
