Abstract (en)

Repellency effects of high quality and permanence are obtained on a wide range of textile materials on treating them with combinations of A) a perfluoroalkyl-containing polymer and B) a cationically modified polyurethane. <??>The novel compositions are also notable for a comparatively small proportion of costly fluorine compounds.

Abstract (de)

Auf Textilmaterialien verschiedenster Art erhält man Phobieeffekte hoher Qualität und Permanenz, wenn man diese mit Kombinationen aus A) einem Perfluoralkylgruppen enthaltenden Polymeren und B) einem kationisch modifizierten Polyurethan ausrüstet.
