Abstract (en)
[origin: EP0430056A1] The invention relates to a sump (1, 3) for an internal combustion engine, with a flat base part (1) and a deep tank section (3) as oil sump and an intake pipe (4) of an oil pump immersed in the deep tank section. <??>It is proposed according to the invention that the deep tank section (3) be designed as a removable oil can. The oil change can thereby be performed rapidly and without harm to the environment without draining off the oil since all the oil is received by the oil can. <IMAGE>
