Abstract (en)

[origin: EP0430132A1] The heating rail (2) is convexly curved in relation to the yarn. To attach the yarn, the yarn is first laid onto the flat which closes the heating rail. For this, the flat (6) has yarn guides (15, 16) on its top side (7). As a result of the opening of the flat, the yarn is thrown off from the yarn guides, so that it falls into the yarn running groove of the heating rail (2). <IMAGE>
