Abstract (en)

[origin: EP0430185A2] Handle/spindle fastening device for a lockable door leaf, having an outer handle body and an inner handle body which are connected fixedly in terms of rotation to one another in terms of their mutual spacing via a polygonal pin guided through the door leaf and the lock follower, in such a way that the polygonal pin has a thread which is restricted to its longitudinal edge regions and onto which is screwed a nut to be arranged between one handle body and the lock follower and allowing a length-adjustable fixing of the lock follower.
