Abstract (en)

[origin: WO9000576A1] Said poorly-flammable structural elements are produced using combustible waste synthetic material. They also contain non-flammable inorganic admixtures and a mixture of fireproofing agents. Said components are held together by at least one hardened bonding agent. The structural elements are thus poorly-flammable despite their combustible components.

Abstract (fr)

Lesdits éléments de construction sont fabriqués à partir de déchets synthétiques combustibles. Ils comprennent en outre des éléments additionnels inorganiques non inflammables et un mélange d'agents ignifuges. Lesdits composants sont liés à l'aide d'au moins une colle durcie. Cette composition rend lesdits éléments de construction difficilement inflammables en dépit de leurs constituants combustibles.
