Abstract (en)

[origin: EP0432012A1] The present invention relates to a cylinder head cover for an internal combustion engine of cast material. This cylinder head cover comprises an air filter (F) connected to the intake system of the engine, a settlement chamber (18), integrally cast with the body (1) of the cylinder head cover, and a movable part forming a hood (7) intended to permit access to a filter cartridge (6) fixed in a chamber (5) forming only one single part with the body (1). The present invention has applications, for example, on a motor vehicle with internal combustion engine fitted with such a cylinder head cover. <IMAGE>
