Abstract (en)  
[origin: EP0432382A1] A suction tube (5) between a suction box (8) and the lower delivery roller (12) of a drawing frame of a spinning machine has a tube inner cross-section which narrows towards the suction line over essentially the entire tube length. Also, a plurality of tubes can be combined to form a common structure (5.1). Furthermore, a formed-on seal 6.1, 6.2 or 6.3 can be provided. <IMAGE>
