Abstract (en)

[origin: EP0433246A1] A hook means for lockingly connecting the picture back protection panel to a picture frame body, whose ends can be hooked onto said back panel and onto the picture frame body. Said hook means comprises a substantially, U-shaped central portion (10), having an arm (28) which is located on the side of picture frame body (42) and extends into an as well U-shaped end portion (30). Portion (30) engages into an inner cavity (40) of picture frame body (42). Arm (28) blends into said end portion (30) through a convex curved portion (34) which engages against said back panel (20).
