Abstract (en)
[origin: WO9002857A1] Three parallel support members (12a, 12b and 12c) are each suspended by three rods (14a, 14b and 14c) respectively with the rods having been connected to and slid along the support members during suspension. Planks (16 and 18) connect the support members together rigidly. Wooden slats (26 and 28) are then nailed to the downwardly facing surface of the planks (16 and 18) to completely cover the arrangement from beneath.
