Abstract (en)
[origin: EP0433525A1] A bed insert comprises a slatted frame (2) which has between its head and foot parts (3, 4) a shoulder part (5) which can be swivelled about a transverse axle (8) on the side of the foot part. To increase the lying comfort, the shoulder part (5) is mounted such that it can be swivelled away independently of the head part (3) counter to the force of a support spring (9). <IMAGE>
