Abstract (en)

[origin: EP0433874A1] The invention relates to an introduction device for liquid containers, having nozzles serving to produce water mixing jets and/or air mixing jets or water/air mixing jets which are applied at a plurality of points on the inside (12a) of the container and in each case are connected via an opening in the container to a pump arranged on the outside of the container (12). <??>In particular in order to be able to vary the location of the nozzle, a flexible hollow strip (10) which is provided with a plurality of outflow orifices (11) is detachably clamped to the pipe ends (13b) projecting out of each container opening into the inside of the container or is attached by means of a snap-in connection. <IMAGE>
