Abstract (en)

[origin: EP0433967A2] In a baking oven with an oven muffle which can be closed by a door, the oven muffle being equipped with devices for upper and lower heat, there is fastened on the outside to a floor-side baking oven housing wall (1) a sheet-metal housing (2) which serves to accommodate a heating element for lower heat (3), the heating element for lower heat (3), as a result of the constructional design of the sheet-metal housing (2), being accurately mounted and arranged at a defined distance from the baking oven housing wall (1). <IMAGE>
