

Title (en)

Device for initiating auto-reverse movement of a double acting hydraulic cylinder.

Title (de)

Einrichtung zur automatischen Bewegungsumkehr eines doppelt wirkenden Hydraulikstellgliedes.

Title (fr)

Dispositif pour faire effectuer automatiquement un aller-retour à un vérin double effet hydraulique.

Abstract (en)

In order that the distributor (6) changes position only when the cylinder (19) has actually come to the end of its forward travel, the means of loss of load which creates a draining pressure serving to complete the action of the spring (23) comprises means (25) for regulating the draining pressure at a predetermined value. <IMAGE>

Abstract (fr)

Afin que le distributeur (6) change de position seulement quand le vérin (19) est réellement parvenu au bout de la course aller, le moyen de perte de charge qui crée une pression de vidange servant à compléter l'action du ressort (23), comporte des moyens (25) pour réguler la pression de vidange à une valeur prédéterminée. <IMAGE>
