Abstract (en)

[origin: EP0435352A1] A method of processing silver halide color photographic photosensitive materials for camera use which comprises processing the material in a bath which has a bleaching function and which contains, as a bleaching agent, an aminopolycarboxylic acid ferric complex salt followed by a multi-stage counter-flow water washing and/or stabilization processing wherein the molecular weight of the aminopolycarboxylic acid of the aminopolycarboxylic acid ferric complex salt is from 300 to 450 and the water washing water and/or stabilizer is treated by a reverse osmosis.
