Abstract (en)
[origin: EP0436757A1] A railway track tamping machine (1) for tamping the sleepers of a railway track, has a tamping unit (14) with tamping tools (16) which can dip in to the ballast and can be adjusted and vibrated by means of drives, a track raising and aligning unit (12) and a device (15) for uniformly ballasting the track. Each tamping tool (16) is assigned an outlet opening (17) of the device (15) for the ejection of ballast. <IMAGE>
