Abstract (en)

[origin: EP0437420A2] The invention relates to a control device for, in particular, double-wing, outward sliding doors, outward swinging doors or outward pivoting sliding doors (1) which are actuated by means of push-buttons (3) on the door wing. According to the invention, it is envisaged that, on the part fixed to the vehicle, in the region of the control member or in the region of the end of a light guide facing away from the control member, a light source (9) is provided, and that the control member (3) or its frame or an information surface provided in the region of the control member (3) is designed to be at least partially transparent. <IMAGE>
