Abstract (en)
[origin: EP0438023A1] At least a part of the condenser (11) of a refrigerator is arranged at the rear side of the cabinet of the refrigerator. In order to achieve an increased usable volume of the cabinet, the rear side (5) of the cabinet is provided with a generally planar part (6) and rear side parts (7, 8) which extend laterally at both sides of the planar part (6). The rear side parts (7, 8) extend inclined forward with respect to a rear wall (21) along which the refrigerator is installed. <IMAGE>
