Abstract (en)
[origin: EP0440177A1] The invention relates to a novel design of a shuttering material (1) which has a dovetailed profile which is formed by first dovetailed profile portions (2) each extending in a first axial direction of the material, and second dovetailed profile portions (5) likewise extending in said axial direction, the first and second profile portions (2, 5) being offset relative to one another in a second axial direction, running perpendicularly to the first, of the material and the blank of the shuttering material (1) being angled or bent in at least one region. <IMAGE>
