Abstract (en)

[origin: EP0440417A1] A sealed electrical connector comprises a male housing (10) and a female housing (11) with a seal ring disposed in a cavity in the female housing. The seal ring comprises a rubber ring body (1) having projecting ribs (2) on an outer peripheral surface thereof and a plurality of projecting ribs (3) on an inner peripheral surface thereof. Around the circumference of the ring body (1) and projecting thereinto are a plurality of locking grooves (4). The locking grooves (4) are positioned to correspond with a like plurality of latch projections (12) extending upwardly from a bottom wall in the female cavity and in engagement with the seal ring grooves (4). <IMAGE>
