Abstract (en)

The invention relates to a navigational system of floating structure type, characterised in that it comprises, mounted slidingly on slide rail means (2), at least one hollow impermeable cell (3) which is capable of being displaced by actuating means (4) between a position out of the water (I) and a position under the water (II, III). <IMAGE>

Abstract (fr)

L'invention concerne un système de navigation du type à structure flottante, caractérisé en ce qu'il comporte, montée coulissant sur des moyens de glissière (2) au moins une cellule creuse étanche (3) susceptible d'être déplacée par des moyens d'actionnement (4) entre une position hors de l'eau (I) et une position sous l'eau (II, III). <IMAGE>
