Abstract (en)
[origin: EP0440987A2] Espagnolette fastening for a window or door wing, whose frame profile (1) has a receiving groove (3) open towards the rebate face and having guide webs (5) for an espagnolette. The espagnolette fastening comprises a transmission housing (7), which forms an insertable housing part (7b) and a guide-channel portion (7c), and a longitudinally displaceably mounted coupling slide (19) which is in permanent engagement with the driving pinion (13) and which carries at at least one end a driver set (21) which projects from the guide-channel portion (7c) and which can be coupled to an espagnolette (23). The insertable housing part (7b) has a bearing face (9) for bearing on the groove bottom (31) of the receiving groove (3) and a receiving bore (27), opening into the bearing face (9), for a fastening screw (37) which can be screwed from the rebate side into a threaded bore (39) of the groove bottom (31). <IMAGE>
