Abstract (en)
[origin: EP0441271A2] A cabinet having shelves (34, 35, 36, 37) which are accessible from the front serves to accommodate photographic, phonographic or video equipment and is therefore also described as a media cabinet. It has at least one perforation (20) in its rear wall (16). A masking element (22) is provided in the cabinet, offset forwards relative to this perforation (20), and - when seen from the front - masks or virtually masks the perforation (20). At least one gap (24, 25) is provided between this masking element (22) and the rear wall (16). <IMAGE>
