Abstract (en)

A thermosensitive transfer recording sheet comprising a substrate having thereon a colorant layer, the colorant layer comprising a binder and a dyestuff represented by the following general formula (I): <CHEM> wherein X and Y independently represent a hydrogen atom, a lower alkyl group, or a lower alkoxy group, provided that either of X and Y represents a lower alkoxy group; and R<1> and R<2> independently represent a hydrogen atom, a substituted or unsubstituted alkyl group, a cycloalkyl group, an allyl group, or a substituted or unsubstituted phenyl group, provided that in the case where both of X and Y represent a lower alkoxy group, R<1> represents a hydrogen atom. A thermosensitive transfer recording ink composition for use in forming the colorant layer on a substrate is also disclosed.
