Abstract (en)

[origin: US5184440A] PCT No. PCT/CH90/00206 Sec. 371 Date May 2, 1991 Sec. 102(e) Date May 2, 1991 PCT Filed Sep. 4, 1990 PCT Pub. No. WO91/03617 PCT Pub. Date Mar. 21, 1991. The panel comprises an outer plate (70) supported by a metal frame (71). Two opposite sides of the frame are formed by light metal profiled elements (72, 73) having a rim (74) which extends along one edge (75) of the outer surface of the plate. This rim may be bevelled or right-angled. The plate is clamped between the opposing rims (74) by means of two threaded steel rods (76). The other two edges of the panel are devoid of any metal element. The panel (62) may be placed on the front of a window (63) or an opaque part of the facade. This panel makes it possible to attach, without the use of glue, thin facade facing plates, particularly plates of glass or stone, so that they are virtually the only visible parts of the facade.
