Abstract (en)

In order to prevent the affixing of stickers, graffiti or paint onto posts supporting road signs, the support is surrounded with an enveloping in synthetic material, dyed in the bulk, with longitudinal ribbing arranged so as to offer virtually no surface for the unwanted leaflets. An upper plug renders the enveloping/support assembly leaktight.

Abstract (fr)

Pour empêcher l'apposition d'autocollants, graffiti ou peinture sur des poteaux supports de panneaux de signalisation, on entoure le support d'une gaine en matière synthétique, colorée dans la masse, à cannelures longitudinales disposées de façon à n'offrir pratiquement aucune surface pour les prospectus indésirables. Un bouchon supérieur rend étanche l'ensemble gaine et support.
