Abstract (en)

[origin: EP0442066A2] In a drive for spinning elements of a spinning machine, especially for bobbins and/or wings or a flier, there are mounted on the rail receiving the spinning elements a plurality of drive motors which are arranged distributed over the length of the machine and which each drive at least one spinning element via a toothed-belt drive, these driven spinning elements themselves driving groups of spinning elements via one or more toothed-belt drives.
