Abstract (en)
The protecting band made of flexible material serves for the temporary protection of peripheral edges or the like of objects. The protecting band has snap-on means which with a dual design can be snapped together. The protecting band can be placed around a peripheral edge, for example, of a blade ring of a turbine wheel, the ends overlapping and a ring being formed after snapping together which protects the peripheral edge.

Abstract (de)
Schutzband aus flexiblem Material zum zeitweisen Schutz von umlaufenden Kanten oder dergleichen von Gegenständen. Das Schutzband weist Schnappmittel auf, die bei Doppelartigkeit miteinander verschnappbar sind. Das Schutzband kann um eine umlaufende Kante beispielsweise eines Schaufelkranzes eines Turbinenlaufrades gelegt werden, wobei sich die Enden überlappen und nach Verschnappen ein Ring gebildet ist, der die umlaufende Kante schützt.
