Abstract (en)
[origin: US5170615A] A textile yarn processing machine, in particular a yarn twisting machine, having a plurality of spindle assembly working positions, which is enclosed on both longitudinal sides over its full height with a soundproofing cover comprising several paneling elements which are movable for partially overlapping each other. Between the paneling elements and the working positions of the machine, maintenance units are arranged, which are able to move also in the closed condition of the paneling elements.
