Abstract (en)

[origin: EP0442389A2] The invention relates to a bottom plate (10), provided with bore holes (11a-11d), for parts (3) of ski bindings. In order to provide the possibility in this bottom plate (10) of the attachment screws (5) fastening the bottom plate (10) with their lower end regions before the part (3) of the ski binding is mounted, provision is made for each bore hole (11a-11d), which is recessed in the bottom plate (10) and whose diameter is greater than the diameter of an associated attachment screw (5), to be provided with a radially projecting shoulder (12a-12d). <IMAGE>
