Abstract (en)  
[origin: EP0442770A1] Metallic package with a "peelable" heat-sealed cover in which the fixing of the said cover is facilitated by the structure of the container body. According to the invention, the container body (12) is defined by deep drawing a sheet metal blank, the bottom wall of this deep-drawn body is recessed in order to define a filling opening in it and a cover (16) is fixed to a flat rim (13) of the container body. <IMAGE>
