Abstract (en)
[origin: EP0443316A1] The invention relates to a sanitary bathtub, in particular a whirlpool bathtub, having a draining outlet (1) and a covering hood (10) which projects over the draining outlet (1) with a plate-like covering portion (11), a discharge outlet designed as an annular gap (3) being provided, at any rate in the open position of the covering hood (10), between a peripheral region (20) of the covering portion (11) and a wall portion (2) of the bathtub bottom or a bathtub side wall. The annular gap is designed as a fluidic hair-catching device.
