Abstract (en)

[origin: WO9005827A1] A serving hatch which can be inserted in doors and walls comprises a frame part which can be inserted in an opening in a door or a wall, connected to a closure part (2) with a service hatch opening. The closure part (2) has a impact-resistant transparent panel (18), a receiving groove (6) which receives one edge of this panel (18) and a handle (11) on the opposite edge of the panel (18), which pivots about a swivelling axis (9) parallel to the two edges. The handle (11) has a supporting rod (12) at a distance from the swivelling axis (9), on which the adjacent edge of the panel (18) abuts.
