Abstract (en)

[origin: WO9005639A1] A carbon copy set consists of uninscribed and/or inscribed sheets (1, 2, 3, 4; 10; 16; 23; 29, 30, 31) and/or forms connected along at least one edge. In order to connect the sheets (1, 2, 3, 4; 10; 16; 23; 29, 30, 31), a strip of material (5; 11; 17; 24; 32, 33) is arranged along one edge of each sheet. On one side of these strips of material (5; 11; 17; 24; 32, 33) are one or more adhesive-coated regions (8; 13, 14; 18, 19; 25; 34, 35, 36, 37). One region on each strip serves to attach the strip of material (5; 11; 17; 24; 32, 33) to the sheets and another region provides the adhesive bond to another sheet or carbon copy set.
