Abstract (en)

[origin: EP0444547A1] The closing strips (10) are cut successively from a continuous web (17) of material in the longitudinal or transverse format and then conveyed directly into a magazine (14). The closing strips are then removed therefrom at the lower end, as required. <??>Without conversion, a change in the type of closing strips to be processed can be carried out, in that closing strips are inserted (temporarily) by hand into the magazine (14) set up therefor. <IMAGE>
