Abstract (en)
[origin: WO9007624A1] An insulating glass pane consists of two individual glass panes (1, 2) connected by a plastic spacing frame (3) which has two layers (4, 5) of different composition. The inner layer (4) delimits the interior space of the pane and consists of a hardened adhesive which contains a moisture-absorbing substance. The outer layer (5) consists of a hardened adhesive which is different from the adhesive from which the inner layer (4) is made.
