Abstract (en)

A wrapping box (11) includes upper paperboard (12); lower paperboard (13) arranged so as to become substantially parallel to the upper paperboard; and back paperboard (14) for connecting the back ends of the upper paperboard and the lower paperboard to each other. The wrapping box further includes front paperboard (17) arranged on the front end of either the upper paperboard or the lower paperboard; and side paperboard (15,16) arranged on both sides of the upper paperboard and/or the lower paperboard. The wrapping box is formed into a box-like shape by folding a sheet of mounting paperboard. The front paperboard and the side paperboard are arranged so as to be capable of being bent toward the inside of the wrapping box. <IMAGE>
