Abstract (en)
A triplate antenna (11,13,15) wherein the ground planes (13,15) are flat metal plates screwed together at spaced locations and having arrays of apertures formed by stamping out, wherein a suspended stripline structure is formed as a printed circuit on a thin dielectric film substrate (11) and is supported between and spaced from the ground planes (13,15) and maintained flat by foam dielectric layers (17,19).
