Abstract (en)

[origin: EP0445504A1] The invention relates to a whirlpool tub with water jet nozzle (1) with a housing (10) arranged in the tub wall, to which a pressurised water line (15) and possibly an air feed line (16) are connected and with a nozzle body (20) with a nozzle duct (23) opening into a jet outlet aperture (24) adjustable for varying the direction of the jet discharge, the nozzle body (20) being capable of adjustment to a position in which the jet discharge aperture (24) is lower than the water inlet aperture (25) of the nozzle duct (23) and the water inlet aperture (25) of the nozzle duct (23) is higher than the pressurised water line (15). <IMAGE>
