Abstract (en)

[origin: EP0445718A2] In a graphic type non-impact printer or the like a control means reverses the rotation of a developing roller (7) so as to remove dust or the like caught between the developing roller and a developing blade (8); or the dust or the like is released from its press-held condition between the developing roller (7) and the developing blade (8) even though it cannot be completely removed, thereby it is possible to remove the dust later. <IMAGE>
