Abstract (en)

[origin: EP0445885A1] The invention is in particular adapted to receiving the RDS system in a car radio. <??>The acquisition (BITA) of the identification code of an alternative transmitter, with a view to substituting it for the present transmitter (OKPI), is done by sampling for a fairly short period (TD1) so as to be inaudible. <??>Thus the receiver can include just one tuner. <IMAGE>
