Abstract (en)

[origin: US5211028A] The cleaning of the condensor of a refrigerating or conditioning unit or plant including a condensor of the refrigerant fluid, with a coil, a finning, and an exhaust fan are performed by a brush horizontal mounted on a support that slides vertically in front of the condensor, in its entire height, from the opposed side respect the aspirator, in two corresponding guides and in the way that the bristles can pass in the interstices of the finning skimming this and the coil; and a driving lever or motor for the movement of the above mentioned support with an alternative motion in the above mentioned vertical guides.
