Abstract (en)
The invention relates to a manipulator with strain gauges equipped with a validation button. This manipulator comprises a support part (1); a thin-wall cylindrical tube (5) rigidly fixed, in the region of a first of its extremities (4), to the support part (1); at least two strain gauges (8a, 8d) fixed on the tube in the vicinity of its first extremity (4); an operating handle (6) connected to the other extremity (7) of the tube, this operating handle transmitting to the tube radial manoeuvring forces (9) applied by a user and also constituting a push-button capable of moving along a longitudinal axis (10) of the tube under the action of the user; and a control member (13) housed inside the tube and actuated by the longitudinal movement of the operating handle. <IMAGE>
