Abstract (en)

[origin: WO9007046A1] Coat and bag hanger or apparatus with lock in which cloths are locked between pressing parts (6, 7) and (8, 9) and bag is hanged through its handle in the hook (5). The hanger consists of moveable part (8, 9), which is moved close to stabile part before pressing and screw system, with which pressing parts are pressed against each other. Cloths are locked in the hanger with locking system, with which opening of pressing against each other of pressing parts can be prevented. Unlocking of locking system can be done with several alternative opening and closing methods, such as key system, hole or magnet cards or combination of characters.
