Abstract (en)

[origin: EP0447657A1] The invention relates to a photographic recording material having a layer base and at least one photosensitive silver-halide emulsion layer arranged thereon and containing an antifogging agent of the formula (I) <IMAGE> and a stabiliser of the formula (II) <IMAGE> where X, R1, R2, Z and Me are as defined in the description. Due to the combination of the antifogging agent (I) according to the invention and the stabilisers (II), the sensitivity and gradation can be controlled independently of one another.
