Abstract (en)
[origin: EP0448013A2] The invention relates to a therapeutic apparatus for gaming addicts, comprising a lockable container in which banknotes may be inserted through an appropriate opening without opening the lock. The lock is designed in such a way or is handled in such a way that it cannot be opened during a visit to a gaming establishment or similar, so that access to any winnings which are deposited in the therapeutic apparatus is subsequently impossible for a certain length of time.
