Abstract (en)

The practice grenade intended to be fired with a rifle comprises a metal tube (1) provided with stabilising tail fins (2) and a solid front section (3) which stops the said tube, this front section carrying a hollow nose cone (4) housing an inert marking substance (5). The nose cone (4) is fixed in a removable manner by fitment to the solid front section (3) of the tube (1), this nose cone (4) being sufficiently strong to withstand the firing but being destructible on impact. Use in order to be able to recover the tube after each firing. <IMAGE>
